EDUCATION

Nanyang Technological University

Expected Jul 2028

Bachelor of Computing (Honours) in Computer Science

Singapore

- **Current GPA: 4.56/5.00** (Highest Distinction)
- **Relevant Coursework:** Software Engineering, Algorithm Design & Analysis, Data Structures & Algorithms, Object Oriented Design & Programming

Singapore Polytechnic

Mar 2022

Diploma in Information Technology

Singapore

- **Final GPA: 3.80/4.00**

EXPERIENCE

Singapore Armed Forces

Dec 2022 – Aug 2024, May 2025 – Jul 2025

Software Engineer (NSF)

Singapore

- Developed a **Node.js** and **EJS** QR code attendance system to automate check-in for **300+ participants**, reducing processing time by **~90%** and earning a feature on Army News for its operational impact.
- Executed comprehensive **QA testing** for Python-based Telegram chat-bots, formulating exhaustive test cases to reduce bugs and improve system reliability by **~80%**.
- Conceptualised and developed a mobile manpower tasking application via Microsoft PowerApps, resolving **300+ high-priority cases** through targeted user testing.

EcoExchange Pte. Ltd.

Oct 2021 – May 2022

Lead Frontend Developer (Final Year Project, Singapore Polytechnic)

Singapore

- **Led a 3-man frontend team** to architect and deploy a corporate intranet using **HTML5/CSS3/JS**, reducing development cycle time by **25%**.
- **Digitized legacy paper-based workflows** to track **700+ operational tickets**, improving data retrieval speed by **40%** and increasing reporting accuracy.

Leaptron Engineering Pte. Ltd.

Feb 2021 – Aug 2021

Software Engineer (Intern)

Singapore

- Deployed an **Android (Java)** QR Scanning tool to assist warehouse operations personnel to replace manual data entry and reduce logistical errors.
- Translated operational requirements into functional **C# (WinForms)** applications for fire alarm handling and spatial inventory visualisation, ensuring non-technical staff understood underlying technical logic.
- Architected a **Node.js/MySQL** warehouse management system from scratch, improving accuracy and efficiency of real-time inventory tracking for operational management personnel by **~25%**.

PROJECTS

Personal Website | Source Code

Next.js | Tailwind CSS

- Developed an interactive **LLM chatbot** using **Gemini-2.5 API endpoints** to handle diverse user inquiries, providing instantaneous response delivery through a unified self-service interface.

CellCollab | Website | Source Code

React.js | Node.js | Heroku

- Developed a Conway's Game of Life with multiplayer functionalities, leveraging **WebSockets (Socket.IO)** to ensure low-latency live synchronization across users.

SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, Java, Python, C++, C, C#
- **Frameworks:** Node.js, Express.js, React.js, Next.js, Android SDK, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, MariaDB, MongoDB
- **Tools & Environments:** Git, GitHub
