EDUCATION

Nanyang Technological University

Expected Jul 2028

Bachelor of Computing (Honours) in Computer Science

Singapore

- **Current GPA: 4.66/5.00** (Highest Distinction)
- **Relevant Coursework:** C & C++ Programming, Data Structures & Algorithms, Object Oriented Design & Prog.

Singapore Polytechnic

Mar 2022

Diploma in Information Technology

Singapore

- **Final GPA: 3.80/4.00**

EXPERIENCE

Singapore Armed Forces

Dec 2022 – Aug 2024, May 2025 – Jul 2025

Software Engineer (NSF)

Singapore

- Engineered & deployed a **Node.js** & **EJS** QR code attendance system to automate check-in for 300+ participants, earning a feature on Army News for its operational impact.
- Systematically tested and validated the unit's Python-based Telegram chatbots, boosting system reliability and reducing user-facing issues by ~80% compared to pre-testing periods.
- Developed a mobile variant of a manpower tasking application using PowerApps and validated the core system reliability, successfully closing 300+ high-priority cases.

EcoExchange Pte. Ltd.

Oct 2021 – May 2022

Lead Frontend Developer (Final Year Project, Singapore Polytechnic)

Singapore

- Spearheaded the frontend development efforts and provided technical guidance to two developers to successfully deploy the company's intranet (**HTML5/CSS3/JS**).
- Engineered the core digital workflow, successfully migrating the client from a paper-based process and enabling the system to track and process 700+ critical operational tickets.

Leaptron Engineering Pte. Ltd.

Feb 2021 – Aug 2021

Software Engineer (Intern)

Singapore

- Enabled real-time operational oversight by developing **C# (WinForms)** applications with live alarm handling and spatial inventory visualization.
- Deployed an **Android (Java)** QR scanning tool, replacing manual data entry and reducing logistical errors.
- Developed and deployed the backend logic from scratch using **MySQL** stored procedures and **Node.js**, enabling accurate inventory tracking for the warehouse operations team.

PROJECTS

CellCollab | Website | Source Code

React.js | Node.js | Heroku

- Engineered a real-time multiplayer Game of Life sandbox using **Socket.IO** for concurrent data synchronization.
- Optimized **React.js** rendering logic to minimize re-renders, ensuring fluid performance during peak concurrency.

Internship Placement Management System | Source Code

Java

- Architected a modular CLI application adhering to **SOLID principles**, utilizing the **Singleton Pattern** to centralize global state and ensure data consistency.
- Spearheaded the core implementation, coordinating with the team to translate the codebase into accurate UML architectural documentation and test protocols.

SKILLS

- **Languages:** Java, Python, SQL, TypeScript, JavaScript (ES6+), C++, C, HTML5, CSS3
- **Frameworks:** Node.js, Express.js, React.js, Next.js, Bootstrap, Android SDK
- **Databases:** PostgreSQL, MySQL, MariaDB, MongoDB
- **Tools & Environments:** Linux/Unix, Git, GitHub
